**Title:** Basic Survival Skills for General Aviation Training Record

**Form Numbers:** FAA 3150-3

**Type of Review:** Clearance of a new information collection.

**Background:** The Federal Register Notice with a 60-day comment period soliciting comments on the following collection of information was published on May 14, 2025 (90 FR 20549). The authority for collecting this information is contained in 49 U.S.C. 44703, and 14 CFR 61.31. The data on the Survival Training Record is collected to provide information that the instructor will use to make the course more applicable to those students in attendance while also ascertaining their swimming capability to ensure safety during the hands-on ditching exercise.

The information collected on the Survival Training Record is required by students attending the post-crash survival course. It is reviewed by the training instructor and a member of the Airman Education Program team to personalize the teaching experience, verify the swimming ability and previous survival training experience of those attending this training.

The information collected on the document is done on paper, and not through automated, electronic, mechanical or other technological means. This is because doing so is not possible as it is used in a classroom setting for those that attend training at the time of arrival at the training site and technology is not made available. The form is not available to be printed off the Internet and the information will not be made available to the public.

**Respondents:** It is estimated that this document will be completed by 150 to 200 students, depending on demand, attending post-crash survival training annually at the Civil Aerospace Medical Institute.

**Frequency:** Monthly

**Estimated Average Burden per Response:** 36 seconds per response, 3 minutes to complete per student.

**Estimated Total Annual Burden:** 10 hours annually.

Issued in Oklahoma City, OK on March 6, 2026.
