l. Description of Request: The City of Tacoma is seeking Commission approval to perform a non-capacity efficiency rewind on the Cushman No. 2 Powerhouse Unit 32 turbine-generator. This unit has been operational since 1930, with most major turbine components still in their original state. The last significant turbine overhaul was completed in 1995. The purpose of the proposed amendment is to improve Unit 32's reliability through a planned generator rewind, which will extend its effective service life. The efficiency rewind would be carried out entirely within the existing powerhouse, and there would be no ground disturbance outside the powerhouse. The amendment is limited to generator rewinding, aiming to enhance operational reliability and efficiency. Following the rewind, the generator capacity for Unit 32 would increase from 27 megawatts (MW) to 30 MW, while the turbine capacity would remain unchanged.
