POLICY JUSTIFICATION

Kingdom of Saudi Arabia – F-15 Sustainment

The Kingdom of Saudi Arabia has requested to buy the following non-major defense equipment items: spares and repair parts, consumables and accessories, and repair and return support; ground and personnel equipment; classified and unclassified software and software support; classified and unclassified publications and technical documentation; personnel training and training equipment; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support. The estimated total cost is \$3.0 billion.

This proposed sale will support the foreign policy and national security objectives of the United States by improving the security of a Major non-NATO Ally that is a force for political stability and economic progress in the Gulf Region.

The proposed sale will enhance Saudi Arabia's capability to deter current and future threats by providing sustainment and training support for the Royal Saudi Air Force's F-15 fleet. The Kingdom of Saudi Arabia will have no difficulty absorbing this equipment and services into its armed forces.

The proposed sale of this equipment and support will not alter the military balance in the region.

There will be various contractors associated with the provision of equipment and services involved with this case, and there is no prime contractor. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and contractor.

Implementation of this proposed sale may require the assignment of a small number of additional long-term U.S. civilian contractor or military personnel in the Kingdom of Saudi Arabia. The current number of contractors already performing the requested logistical support in-country will remain relatively stable.

There will be no adverse impact on defense readiness as a result of this proposed sale.
