SUPPLEMENTARY INFORMATION: Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that by undated letter received February 25, 2026, NS petitioned FRA for relief from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 232, Brake System Safety Standards for Freight and Other Non-Passenger Trains and Equipment; End-of-Train Devices. The relevant Docket Number is FRA-2018-0100.

Specifically, NS seeks relief from § 232.203(b)(8), *Training requirements*, to use virtual simulations using web-based or desktop software to satisfy the “hands-on” portion of periodic refresher training for transportation employees. NS states that since the blended training curriculum provides a greater volume of defects than in a real-world scenario, its “employees are able to more accurately identify issues, recognize patterns, and apply corrective actions with greater confidence and consistency.” NS also notes that it is prepared to implement the training “across conductor and supervisor crafts.”
