SUPPLEMENTARY INFORMATION: Under part 235 of title 49 Code of Federal Regulations (CFR) and 49 U.S.C. 20502(a), this document provides the public notice that by letter received March 9, 2026, PSPR petitioned FRA seeking approval to discontinue or modify a signal system. FRA assigned the petition Docket Number FRA-2026-0661.

Specifically, PSPR requests to discontinue the signal interlocking system on the Elma Mainline in Aberdeen, Washington, at the swing bridge at milepost (MP) 72.2. In addition, the power derails, 2 block signals, and 1 distant signal would be removed. PSPR explains in its petition that the swing bridge interlocker is no longer essential for the safe movement of railway traffic and is incurring costs due to vandalism. However, the bridge will remain lined for river traffic.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

Communications received by **[INSERT DATE 60 DAYS AFTER DATE OF PUBLICATION IN THE FEDERAL REGISTER]** will be considered by FRA before final action is taken. Comments received after that date will be considered if practicable.
