The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at <https://www.regulations.gov> and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, NRC Form 748, "National Source Tracking System Report." The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a *Federal Register* notice with a 60-day comment period on this information collection on December 11, 2025, 90 FR 57490.

1. *The title of the information collection:* NRC Form 748, "National Source Tracking System Report."
2. *OMB approval number:* 3150-0202.
3. *Type of submission:* Extension.
4. *The form number, if applicable:* NRC Form 748.
5. *How often the collection is required or requested:* On occasion (at completion of a transaction, and at inventory reconciliation).

6. *Who will be required or asked to respond:* Licensees that manufacture, receive, transfer, disassemble, or dispose of nationally tracked sources.

7. *The estimated number of annual responses:* 17,825.

8. *The estimated number of annual respondents:* 977.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 2,181.

10. *Abstract:* The NRC's National Source Tracking System (NSTS) is a secure, centralized database used to track the life cycle of certain high-risk sealed radioactive sources. Licensees are required to report key transactions involving these nationally tracked sources, including manufacture, transfer, receipt, disassembly, and disposal. These reporting requirements, first established in 2006 and fully implemented in subsequent years, support a comprehensive radioactive source control program for radioactive materials of greatest concern. Information collected through the NSTS is mandatory and plays a critical role in enhancing the NRC's and Agreement States' ability to track sources from manufacture through final disposition. The NSTS strengthens regulatory oversight by supporting inspections and investigations, enabling timely communication with other government agencies, and verifying the legitimate ownership and use of these sources.
