The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

l. Description of Request: The licensee is requesting a temporary variance of the required minimum flow to the bypassed reach at the Upper Development Dam #1 under Article 40 of the project license, for the construction of a cofferdam to facilitate in-kind maintenance activities on the pelican gates. This request is similar in its scope and timeframe to the licensee's prior request, filed December 2, 2024, supplemented on February 7, 2025, that it withdrew due to delays obtaining local permits and approvals.

The variance would entail cessation of the required minimum flows to the bypass reach, of which approximately 500 feet would be dewatered from approximately August through December 2026. This variance should allow adequate time for cofferdam construction, dewatering, and inspection and repair of the gates. The licensee has reinitiated consultation with the resource/permitting agencies, Tribes, and stakeholders for the work, including consultation for cultural resources. The licensee consulted with Idaho Fish and Game to survey the dewatered reach to capture and relocate any stranded fish and place gravel in the dewatered bypass reach for fisheries spawning restoration and enhancement. The licensee would perform the proposed work using best management practices to protect water quality and prevent erosion of project lands or sedimentation of project waters.
