Title: Reauthorization Section 769 Survey to Evaluate Airport Rescue and Firefighting (ARFF) Staffing Levels

Form Numbers: N/A

Type of Review: This is a review of a new information collection

Background: The Federal Register Notice with a 60-day comment period soliciting comments on the following collection of information was published on December 2, 2025 (90 FR 55328).

Currently, 14 CFR 139.319 does not require an individual to be trained as an emergency medical technician (EMT). Instead, section 139.319(i)(4) requires one individual, who has been trained and is current in basic emergency medical services, to be available during air carrier operations. Section 769(a) of the FAA Reauthorization Act of 2024 (the “Act”) instructs the FAA to update section 139.319 to ensure that at least one individual maintains certification at the EMT basic level, or higher, at a small, medium, or large hub airport. Section 769(b) of the Act also requires the FAA to conduct a review of airport environments and related regulations to evaluate sufficient staffing levels necessary for firefighting, rescue, and emergency medical services and responses at airports certified under part 139.

To carry out the requirements of section 769 of the Act, the FAA will develop a questionnaire to:

- Establish an initial baseline of airport rescue staffing levels/resources;
- Assist the FAA in conducting a staffing review of airports to evaluate sufficient staffing levels necessary for emergency medical services at Part 139 airports; and
- Support its upcoming Notice of Proposed Rulemaking addressing the EMT certification requirement.

Respondents: 518 airports

Frequency: Once

Estimated Average Burden per Response: 2 hours

Estimated Total Annual Burden: 1.036 hours

Issued in Washington, DC.

Kelvin K. Ampofo,

Acting Manager, Airport Safety and Operations (AAS-300).
