Abstract of information available

Human remains representing, at least, one individual has been identified. No associated funerary objects are present. In March 1907, Princeton Paleontology/Geosciences Professor Gilbert Van Ingen and students removed the human remains (Ancestor) from "Indianfield Bluff," West of Yorktown, York County, Virginia, during a paleontological expedition. In 1907, the Ancestor was accessioned to the now defunct Princeton Museum of Natural History and became

part of the vertebrate paleontology teaching collection. Princeton University has no knowledge or record of the presence of any potentially hazardous substances used to treat the human remains.

Cultural affiliation
