Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; determination on a Tribal Resource Management Plan.

SUMMARY: Notice is hereby given that NMFS has made a final determination on the Yurok Tribe's Tribal Resource Management Plan (TRMP). The determination is pursuant to the limitation on take prohibitions for actions conducted under Tribal Resource Management Plans promulgated under the 4(d) Rule of the Endangered Species Act (ESA) (Tribal 4(d) Rule). The TRMP specifies harvest and monitoring activities for tribal fisheries affecting ESA-listed Southern Oregon/Northern California Coast Coho Salmon in the portion of the Klamath River within the Yurok Reservation. As required by the Tribal 4(d) Rule, NMFS sought public comment on its pending determination prior to making a final determination.

SUPPLEMENTARY INFORMATION:

ESA Listed Species Covered in This Notice

Southern Oregon / Northern California Coast Coho salmon (*Oncorhynchus kisutch*)
Evolutionarily Significant Unit: threatened, naturally produced, and artificially propagated.

Background

The Yurok Tribe submitted a TRMP for review under the ESA Tribal 4(d) Rule. Under Section 4 of the ESA, the Secretary of Commerce (Secretary) is required to adopt such regulations as deemed necessary and advisable for the conservation of species listed as threatened. The ESA salmon and steelhead 4(d) rule (65 FR 42422, July 10, 2000, as updated in 70 FR 37160, June 28, 2005) specifies categories of activities that contribute to the conservation of listed salmonids and sets criteria for such activities to qualify as limits on take prohibitions. The ESA Tribal 4(d) Rule (65 FR 42481, July 10, 2000) states that the take prohibitions of ESA Section 9 will not apply to a TRMP provided that the Secretary has determined that the TRMP will not appreciably reduce the likelihood of survival and recovery for the listed species (50 CFR 223.204(a)).

The Yurok Tribe's TRMP provides a framework through which tribal salmon fisheries can be implemented while meeting requirements specified under the ESA. The TRMP describes the proposed fisheries, establishes limits for harvest, and describes monitoring and reporting provisions associated with the fisheries. The TRMP management objective is for the Tribe to conduct fisheries in a manner that does not appreciably reduce the likelihood of survival and recovery of ESA-listed coho salmon.

NMFS has analyzed the effects of the TRMP on ESA-listed salmon and steelhead species and has concluded that the TRMP would not appreciably reduce the likelihood of survival and recovery of ESA-listed species, while providing for the proposed tribal harvest opportunities. Our determination depends upon implementation of all of the monitoring, evaluation, reporting tasks or assignments, and enforcement activities included in the TRMP, and that the fisheries stay within the impact limits described in the TRMP.

Summary of Comments Received on the Proposed Evaluation and Pending Determination

Prior to making a final determination on Tribal Plans, NMFS must take comments on its pending determination as to whether or not implementation of the plan will

appreciably reduce the likelihood of survival and recovery of ESA-listed salmonids (50 CFR 223.204(b)(3)). NMFS assessed the TRMP and prepared a Proposed Evaluation and Pending Determination (PEPD). The PEPD was posted on the NMFS website and a notice of availability was posted in the **Federal Register** on July 28, 2025 (90 FR 35512). The public comment period expired on August 27, 2026. We received one comment letter on the information contained in the PEPD, which is addressed in the final Evaluation and Recommended Determination (ERD). The PEPD and the final ERD are available at: <https://www.fisheries.noaa.gov/action/tribal-resource-management-plan-trmp-yurok-tribe>.
