NATIONAL SCIENCE FOUNDATION

Proposal Review Panel for Information and Intelligent Systems; Committee Renewal

AGENCY: National Science Foundation.

ACTION: Committee Management Renewal.

SUMMARY: The National Science Foundation (NSF) is renewing the committee for Proposal Review Panel for Information and Intelligent Systems.

DATES: NSF approves the continuation of this committee on 4/20/2026. Effective date for renewal is June 26, 2026. For more information, please contact Crystal Robinson, NSF, at (703) 292-8687.

FOR FURTHER INFORMATION CONTACT: Crystal Robinson, Committee Management Officer, NSF, at (703) 292-8687, or by mail to National Science Foundation, Randolph Building, 401 Dulany Street, Alexandria, VA 22314.

SUPPLEMENTARY INFORMATION:

The NSF management officials having responsibility for the advisory committee listed below have determined that renewing this committee for another two years is necessary and in the public interest in connection with the performance of duties imposed upon the Director, National Science Foundation (NSF), by 42 USC 1861 et seq. This determination follows consultation with the Committee Management Secretariat, General Services Administration.

Committee:

Proposal Review Panel for Information and Intelligent Systems, #1200

Pursuant to 41 U.S.C. § 102-3.60(a), to establish, renew, reestablish, or merge a discretionary (agency discretion) advisory committee, an agency must first consult with the General Services Administration's Committee Management Secretariat (the Secretariat) and, as part of the consultation, provide a written public interest determination approved by the head of the agency to the Secretariat with a copy to the Office of Management and Budget. In addition, pursuant to 41 U.S.C. § 102-3.35, an agency shall follow the same consultation process and document in writing the same determination of need before creating a subcommittee under a discretionary committee that is not made up entirely of members of a parent advisory committee.

Information on the following factors for the committee is provided to the Secretariat to demonstrate that renewing the committee is in the public interest:

1. Annual budget:

\$508,172

a. Federal personnel on a full-time equivalent (FTE) basis

9.26

b. Other Federal internal costs

\$3,500

c. Proposed payments to members

\$504,672

d. Proposed number of members

1244

e. Reimbursable costs

0

2. If applicable, the total dollar value of grants expected to be recommended during the fiscal year:

\$324,438,008

3. Criteria for selecting members to ensure the committee has the necessary expertise and fairly balanced membership.

Committee members are selected based on their scientific and technical expertise, professional experience, and ability to provide informed, objective advice on proposals within the scope of CISE activities. Membership is drawn from a range of disciplines (e.g., computing, engineering, mathematics, social and behavioral sciences) to ensure representation of the scientific areas encompassed by the committee's review portfolio. Members consist of approximately 1244 members considering all meetings. The subject matter and volume of proposals to be reviewed determine the number of members participating in any given meeting. Every effort is made to ensure balanced membership, including representation across scientific disciplines, institutions, and geographic regions. Members are selected to provide complementary perspectives and the depth of technical expertise necessary to conduct thorough and credible proposal reviews. The majority of committee members are anticipated to be comprised of Special Government Employees (SGEs) with a small percentage of Regular Government Employees (RGEs) when subject matter expertise requires.

4. List of all other Federal advisory committees of the agency

- 57 Proposal Review Panel for Graduate Education
- 59 Proposal Review Panel for Research on Learning in Formal and Informal Settings
- 173 Proposal Review Panel for Engineering Education and Centers
- 1172 Alan T. Waterman Award Committee
- 1173 Committee on Equal Opportunities in Sciences and Engineering
- 1185 Proposal Review Panel for Cyberinfrastructure
- 1186 Proposal Review Panel for Astronomical Sciences
- 1189 Proposal Review Panel for Chemical, Bioengineering, Environmental, and Transport Systems
- 1191 Proposal Review Panel for Chemistry
- 1192 Proposal Review Panel for Computing & Communication Foundations
- 1194 Proposal Review Panel for Civil, Mechanical, and Manufacturing Innovation
- 34558 Proposal Review Panel for Emerging Frontiers and Multidisciplinary Activities
- 1203 Proposal Review Panel for Materials Research
- 1204 Proposal Review Panel for Mathematical Sciences
- 1207 Proposal Review Panel for Computer and Network Systems
- 1208 Proposal Review Panel for Physics
- 1209 Proposal Review Panel for Polar Programs
- 1214 Proposal Review Panel for Undergraduate Education
- 1569 Proposal Review Panel for Earth Sciences
- 1756 Proposal Review Panel for Geosciences
- 1766 Proposal Review Panel for Social, Behavioral and Economic Sciences
- 2469 Proposal Review Panel for Integrative Activities
- 10743 Proposal Review Panel for Biological Infrastructure
- 10744 Proposal Review Panel for Environmental Biology
- 10745 Proposal Review Panel for Integrative Organismal Systems
- 10746 Proposal Review Panel for Molecular and Cellular Biosciences
- 10747 Proposal Review Panel for Behavioral and Cognitive Sciences
- 10748 Proposal Review Panel for Social and Economic Sciences

10749 Proposal Review Panel for International Science and Engineering
10751 Proposal Review Panel for Atmospheric and Geospace Sciences
10752 Proposal Review Panel for Ocean Sciences
13883 Astronomy & Astrophysics Advisory Committee (Exempt)
34558 Proposal Review Panel for Emerging Frontiers & Multidisciplinary Activities
44011 Proposal Review Panel for Emerging Frontiers in Biological Sciences
84683 Proposal Review Panel Translational Impacts
84684 Advisory Committee for Technology, Innovation and Partnerships
84685 Proposal Review Panel for Innovation and Technology Ecosystems

5. Justification that the information or advice provided by the Federal advisory committee or subcommittee is not available from another Federal advisory committee, another Federal Government source, or any other more cost-effective and less burdensome source.

Proposal peer review is central to NSF processes. Specific advisory committees (i.e., review panels) are impaneled for individual programs to directly provide the technical expertise relevant to the proposals under review of distinct subject areas. Notably, the CISE Directorate supports multidisciplinary and interdisciplinary activities that encompass a wide range of computing, communication foundations and scientific areas necessitating the recruitment of committee members with unique combinations of technical expertise.

6. If the consultation is a committee renewal, a summary of the previous accomplishments of the committee and the reasons it needs to continue.

Past committees have been instrumental in identifying cutting edge topics and projects that pursue bold, innovative research that addresses national needs, strengthens U.S. leadership and fosters advances in new areas of fundamental or applied research, catalyzes development of new industries or capabilities that increase the leadership position for the country, and/or makes significant progress towards addressing a national need or grand challenge, particularly in current priority areas including, but not limited to, artificial intelligence, robotics, biotechnology, and quantum information science. An example of a groundbreaking area identified by the committee is Artificial Intelligence, which has been funded by IIS since the 1980s, well before it became a priority topic at NSF and subsequently a multi-agency initiative: the National Artificial Intelligence

Research Institutes.

7. Explanation of why the committee/subcommittee is essential to the conduct of agency business.

The CISE FACA committees are essential to the conduct of agency business as they align with the agency's usage of the merit review process and criteria in keeping with 42 U.S. Code 1862s, which outlines that "the Foundation's intellectual merit and broader impacts criteria are appropriate for evaluating grant proposals" and directs the Foundation to "maintain the intellectual merit and broader impacts criteria, among other specific criteria as appropriate, as the basis for evaluating grant proposals in the merit review process."

NSF's mission as described in the 1950 NSF act, is "to promote the progress of science, advance national health, prosperity, and welfare, and secure the national defense. This is achieved by investing in research to expand knowledge in science, engineering, and education, and by increasing the capacity of the U.S. to conduct and benefit from such research. Merit review panels under these FACA committees serve as the basis for the gold standard merit review to support the most compelling research to advance the NSF mission.

This public interest determination documents that renewing the committee is in the public interest, essential to the conduct of agency business, and that the information to be obtained is not already available through another advisory committee or source within the Federal Government.

Dated: May 26, 2026

Crystal Robinson

Committee Management Officer

National Science Foundation
