**SUPPLEMENTARY INFORMATION:** The BLM is seeking public comment on potential updates to BLM Manual 6330 – Management of Wilderness Study Areas. The manual provides policy and guidance for managing wilderness study areas (WSAs) to maintain their suitability for potential congressional designation as wilderness, until Congress makes a final determination. It defines the non-impairment standard for WSAs and outlines requirements for BLM managers to manage the resources on these lands in a manner that maintains each WSA’s suitability for preservation as wilderness. The WSA policy applies to: (1) WSAs identified by the wilderness review required by section 603 of the Federal Land Policy and Management Act (FLPMA); (2) Legislative WSAs established by Congress; and (3) WSAs that were identified and submitted to Congress in Wilderness Study Reports under the authority of section 202 of FLPMA. With respect to certain section 202 WSAs that were identified after the Wilderness Study Reports were submitted to Congress, this policy applies until the designation is changed through BLM’s land use planning process. The BLM is interested in receiving information and recommendations regarding whether updates, clarifications, or other revisions to existing Manual 6330 may be appropriate.
