SUPPLEMENTARY INFORMATION:

A. Purpose

Executive Order 14400, Urgent National Action to Save College Sports, directs the Administrator of General Services to propose a regular collection of information to evaluate compliance with the rules covered in the EO to aid contract and grantmaking agencies' compliance with the EO starting August 1, 2026.

The System for Award Management (SAM or SAM.gov) serves as the primary registration and award management database for the U.S. Federal Government. SAM currently collects, validates, stores, and disseminates data in support of agency acquisition and financial assistance missions. SAM validates entity registration information and electronically shares the secure and encrypted data with Federal agency personnel to facilitate their award making and payments. Additionally, SAM shares its data with Federal Government procurement, financial assistance, and electronic business systems.

Both current and potential Colleges and Universities are required to register in SAM pursuant to Title 2 of the Code of Federal Regulations (CFR) and the Federal Acquisition Regulation (FAR) to receive specified Federal

awards. Entities complete a registration process to provide basic information relevant to procurement and Federal financial assistance transactions. These entities may also report various information applicable to the federal award process in SAM.gov.

Registered entities identified as Higher Education Institutions during the SAM entity registration and meeting the $20M (adjusted for inflation) threshold for intercollegiate athletics activities revenue will certify their compliance quarterly with the terms within EO 14400. This certification information will be available for Federal officials for contract and grantmaking activities and compliance verification.

B. Annual Reporting Burden

Total Burden Hours: *$241,557 ($161,589.50 for screening response and $79,967.50 for certification response).*

C. Public Comments:

Public comments are particularly invited on: Whether

this collection of information is necessary, whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

OBTAINING COPIES OF PROPOSALS: Requesters may obtain a watermarked "DRAFT" copy of the supporting statement via the Federal eRulemaking portal at *regulations.gov* and searching for Docket ID "GSA-GSA-2026-0265."
