Needs and Uses: In January 2026, the Federal Communications Commission adopted the *Foreign Adversary Control Report & Order* which established new attestation and disclosure requirements for Commission regulated entities to report whether and the extent to which they are owned, controlled, or subject to the jurisdiction of a foreign adversary. The Order categorized each Commission assigned license, authorization, and other approval into different schedules with different levels of attestation and disclosure requirements based on their importance to national security. Respondents who indicate they are subject to control by a foreign adversary must report additional information on the nature of that control. The Order additionally establishes ongoing reporting triggers and a streamlined enforcement and revocation process for non-compliance when necessary. Finally, the Order directed the Commission to establish a new system and procedures for collecting the information from regulated entities.

The information collected in the Foreign Adversary Risk Report will fill critical information gaps in the existing understanding of the threat that adversaries pose to U.S. networks. As such, the information from the collection will improve the Commission's situational awareness of the threat that foreign adversaries currently pose. The Commission will use this information in support of various rulemakings and proceedings as they relate to national security and in developing appropriate actions to mitigate and eliminate threats from adversarial control or influence. Additionally, certain information from the attestation and the additional disclosures will be

made available to the public for inspection, subject to privacy and confidentiality considerations, to improve transparency into U.S. communications network and enable outside parties to raise concerns where appropriate.
