Abstract of information available

Human remains representing, at least, five individuals have been identified along with

their belongings. The 10 lots of associated funerary objects include glass, shell and other beads, buttons, crotal bells, copper objects including tinkling cones, and other historic period cultural items.

These Ancestors and their belongings were removed during a 1938 Works Progress Administration project conducted at 40PK1, Ocoee, in Polk County, Tennessee. They were removed from unit 2PK1 which was identified as a Historic Cherokee town, and the Ancestors were identified as Historic Cherokee based on associated site features and cultural material.

UTK records indicate that preservatives, glues and lacquer have been utilized on some of the Ancestors in the laboratory for preservation and reconstruction purposes.

Cultural affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the human remains and associated funerary objects described in this notice.

Determinations

UTK has determined that:

- The human remains described in this notice represent the physical remains of five individuals of Native American ancestry.
- The 10 lots of objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a connection between the human remains and associated funerary objects described in this notice and the Cherokee Nation; Eastern Band of Cherokee Indians; and the United Keetoowah Band of Cherokee Indians in Oklahoma.
