Abstract of information available

Human remains representing at least 100 individuals have been identified from site 16RI13, Gold Mine, in Richland Parish, LA. At minimum, 13 associated funerary objects are

present including ceramics. Excavations took place in the summers from 1978 to 1980. Avocational archaeologists conducted 1978 session. In 1979, the volunteers were partially supervised by an osteology graduate student from the University of Arkansas. In 1980, John Belmont from Harvard University was hired with the help of an NSF grant. The Gold Mine collection remained at University of Arkansas in Fayetteville after the culmination of fieldwork. In early 2002, the human remains were loaned to Mark Murray at the University of Tennessee in Knoxville. In August of 2002, the remaining collection was transferred to University of Louisiana Lafayette. Upon completion of analysis, the collection was donated to LDOA on June 16, 2006. On August 3, 2021, the human remains were returned to the remaining collection.
