

DEPARTMENT OF DEFENSE

Office of the Secretary

[Transmittal No. 0D-26]

Arms Sales Notification

AGENCY: Defense Security Cooperation Agency, Department of Defense (DoD).

ACTION: Arms sales notice.

SUMMARY: The DoD is publishing the unclassified text of an arms sales notification.

FOR FURTHER INFORMATION CONTACT: Urooj Zahra at (703) 695-6233,

urooj.zahra.civ@mail.mil, or dsca.ncr.rsrmgmt.list.cns-mbx@mail.mil.

SUPPLEMENTARY INFORMATION: This 36(b) arms sales notification is published to fulfill the requirements of section 155 of Public Law 104-164 dated July 21, 1996. The following is a copy of the attached Transmittal 0D-26.

Dated: August 31, 2026.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer,

Department of Defense.

Transmittal No. 0D-26

REPORT OF ENHANCEMENT OR UPGRADE OF
SENSITIVITY OF TECHNOLOGY OR
CAPABILITY (SEC. 36(B)(5)(A), AECA)

(i) Prospective Purchaser: Government of Canada

(ii) Sec. 36(b)(1), AECA Transmittal No.: 23-72

Date: September 15, 2023

Implementing Agency: Air Force

(iii) Description: On September 15, 2023, Congress was notified by congressional certification transmittal number 23-72 of the possible sale, under Section 36(b)(1) of the Arms Export Control Act (AECA), of munitions and other systems to be integrated into MQ-9Bs purchased through Direct Commercial Sales, to include: twelve (12) AN/APY-8 Lynx Synthetic Aperture radars; two hundred nineteen (219) AGM-114R2 Hellfire II missiles; eighteen (18) KMU-572 tail kits for the GBU-38 Joint Direct Attack Munition (JDAM) and GBU-54 Laser JDAM (LJDAM); twelve (12) Mk82 500-lb general purpose bombs; and six (6) Mk82 filled inert bombs. Also included were Due Regard Radars; SAGE 750 and SNC 4500 Electronic Surveillance Measures Systems; AN/ARC-210 radios; Compact Multi-Band Data Link; KY-100M narrowband/wideband terminals; KOR-24A small tactical terminals; High-Bandwidth Compact Telemetry Modules (HCTM); KIV-77 cryptographic appliques and other Identification Friend or Foe equipment; AN/PYQ-10C Simple Key Loaders; Common Munitions Built-In-Test/Reprogramming Equipment; FMU-139 Joint Programmable Fuses; M299 Hellfire launchers and training missiles; DSU-38 Precision Laser Guidance Sets; classified publications and technical documentation; munitions support and support equipment; secure communications, precision navigation, and cryptographic equipment; spare and repair parts, consumables, accessories, and repair and return support; unclassified software delivery and support; testing and integration support and equipment; maps and charts; personnel training and training equipment; transportation support; warranties; studies and surveys; Contractor Logistics Support; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support. The estimated total value was \$313.4 million. Major defense equipment (MDE) constituted \$75.2 million of this total.

On June 10, 2025, Congress was notified by congressional certification transmittal number 25-0P of the possible sale, under section 36(b)(5)(C) of the AECA, of the addition of the following MDE items: sixteen (16) JDAM KMU-572 tail kits for GBU-38 or LJDAM GBU-54; eighteen (18) inert filled Mk-82 bombs; four (4) AN/APY-8 Lynx synthetic aperture radars; and eight (8) Hellfire Captive Air Training Missiles. Also included were: M34 Hellfire training missiles; Hellfire support equipment; AN/ALQ-230 Radar Warning Receiver/Electronic Support Measures system; Computer Program Identification Numbers; minor and major modifications and kits; aircraft and engine support equipment; and other related elements of logistics and program support. The estimated total value of the new items was \$149 million. The estimated MDE value increased by \$27 million to a revised \$102.2 million. The estimated non-MDE value increased by \$122 million to a revised \$359.2 million. The estimated total case value increased by \$149 million to a revised \$462.4 million.

This transmittal reports the inclusion of the following additional MDE items: forty (40) Embedded Global Positioning System (GPS)/Inertial Navigation Systems (EGI) (33 installed, 7 spares). The estimated total value of the new items is \$12 million. The estimated MDE value will increase by \$12 million to a revised \$114.2 million. The estimated non-MDE value will not increase and remain at \$359.2 million. The estimated total case value will increase by \$12 million to a revised \$474.4 million.

(iv) Significance: This notification accounts for additional MDE items not included in the original notification. The inclusion of this MDE represents an increase in capability over what was previously notified. The proposed articles and services will improve Canada's capability to

meet current and future threats by enabling unmanned surveillance and reconnaissance patrols of its northern arctic territories. It will also enable Canada to optimally fulfill its North American Aerospace Defense and NATO missions while increasing interoperability with U.S. and NATO forces.

(v) Justification: This proposed sale will support the foreign policy and national security objectives of the United States by helping to improve the military capability of a NATO Ally that is an important force for ensuring political stability and economic progress and is a contributor to military, peacekeeping, and humanitarian operations around the world.

(vi) Sensitivity of Technology:

The EGI with Selective Availability Anti-Spoofing Module (SAASM), Y-Code, or M-Code receiver when available, and Precise Positioning Service is a self-contained navigation system. SAASM, Y-Code, or M-Code enables the GPS receiver access to an encrypted P-signal, providing protection against active spoofing attacks.

The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

(vii) Date Report Delivered to Congress: July 21, 2026
